Your Head

Accordion

Accordion is a plugin for RapidWeaver. It builds a dynamic interactive menu-driven interface from your text and graphics. Items open with a smooth slide and close when you choose other content. The content can be just about anything you like: text, graphics, and HTML.

Licence : 9\$95

<http://www.yourhead.com/accordion/index.html>

Carrousel

Carrousel adds a bar of thumbnails that zoom side to side. Click on one and the content fades in below.

Carrousel works with any content, but it's great for building animated photo albums. Just drop a folder full of images into Carrousel, select a style, and click Publish. It's that easy.

Licence : 11\$95

<http://babgond.com/page/rapidweaver/2008/2015/Babgond> <?php echo 'Mis à Jour le ' . date('d/m/Y.', getlastmod()); ?>

<http://www.yourhead.com/carousel/index.html>

Blocks

Blocks is a drag & drop, freeform layout editor for RapidWeaver. It lets you move text, images, html, and even content from other pages right where you want it. You can move, resize, and style to your hearts content. Build anything with Blocks.

Licence : 24\$95

<http://www.yourhead.com/blocks/index.html>

Stacks

Stacks is fluid layout for RapidWeaver. Stacks is designed to combine the drag-and-drop simplicity of Blocks with the power of fluid layout. Stacks lets you build pages that flow text to the dimensions of a theme even if the theme has a variable width. You can build flowing columns, flexible rows, and tiles of images. You can build columns within columns within rows within columns. Or group a stack of objects inside a box. Almost anything is possible with Stacks.

Licence : 19\$95

<http://www.yourhead.com/stacks/index.html>

Collage

Collage builds great looking thumbnails from your images, styles them all with slick graphical effects, and links them to other content on your site. With Collage you can add smooth Javascript animations like lightbox effects, slideshows, or a pop-up hovering info box. And you don't have to be an computer guru to do it. Just drag in a few images, select a style, and publish.

PageTOC

PageTOC is a plugin page style for the web authoring software RapidWeaver for the Macintosh (<http://www.realmacsoftware.com>). It lets you automatically add a table of contents to your styled text pages. The table of contents is created from the HTML headings in the text, that you create with RapidWeaver from the menu Format -> HTML -> Heading X. It is put either to near the beginning of your text, after a preamble you can define, or added to the sidebar. Clicking on a heading in the table of contents navigates the browser to its location in the text.
